Subject Index Volume 79 (1993)

alumina membranes, 123

bacteria, 35
barrier membranes, 1
biotechnology, 35

ceramic membranes, 55, 65, 123
charged membranes, 159
colloidal solutions, 285
controlled release, 11
coupled, facilitated transport, 211

diffusion, 123, 181, 211
diffusion layer, 199
diffusiophoresis, 211

electric fields, 115
electrochemical interaction, 227
electrochemistry, 159, 181
electrodialysis, 199
electroosmosis, 199

facilitated transport, 273
fouling, 93

gas and vapor permeation, 123
gas separations, 1, 65, 123
gel layer formation, 241

hydrogels, 35

inorganic membranes, 123
ion-exchange membranes, 181, 211

limiting current, 199
liquid membranes, 273

macromolecule purification, 241
macrosolutes, 35
membrane modification, 55, 65
membrane morphology, 115
membrane preparation and structure, 27, 65, 83
membrane selectivity, 101
microcapsules, 11
microfiltration, 35
microfiltration membranes, 285
microporous and porous membranes, 55
microporous membranes, 27

nuclear filters, 285

O_2/N_2 selectivity, 1

pervaporation, 101
phase inversion, 27
phase separation, 27
plant effluent, 93
polarization, 199
polyelectrolytes, 253
polymer blends, 83
polymeric membranes, 115
polysulfone–polyvinylpyrrolidone blend, 115
pore size change, 65
pore size distribution, 55

retention mechanism, 227
reverse osmosis, 133, 285

selective binding, 253
separation of hydrogen/methanol, 123
space-charge model, 133
structure–properties relationship, 181
subambient temperature operation, 1
surface pore defects, 115

theory, 55, 101, 133, 181, 211, 227, 241, 253
track membranes, 285
transport equation, 101
turbulence promotion, 93

ultrafiltration, 83, 93, 227, 241, 253
UV irradiation, 1

vapor–liquid equilibrium, 101
viruses, 285

waste water, 93
water treatment, 253
